

Open Finance Framework Version 2

Operational Rules (synthetic fixture)

SYNTHETIC TEST FIXTURE. This document is original test data created for the bg-spec MCP server. It is not a Berlin Group publication and has no normative value.

3 Transaction History Access

The ASPSP SHALL make at least 90 days of transaction history available through the transaction list endpoint.

Without active PSU involvement the TPP MUST NOT read the transaction list of an account more than four times per calendar day. The limit is counted per account and per consent.
